USDA-ARS/OSU Cooperative Breeding Program

Fresh Market & Ornamental Blackberries for Grower Trial

Chad E. Finn, Mary Peterson, Bernadine C. Strik, Pat Jones

Semi-erect, Thornless	Yield	Fruit Size (vs. 'Chester' = 4.5-5.0 g)	Other Characteristics	Available at Nursery?
'Twilight' (ORUS 4370-1)	High	1.5X Larger	**Thornless**, semi-erect habit. Productive. Very, very firm with tough skin and good flavor. Ripens in similar season to 'Triple Crown'.	Yes
ORUS 4670-1	Very high	Larger	**Thornless.** Fantastic quality, especially flavor! **Higher yield** than 'Chester Thornless'. Similar season or slightly earlier than "Chester Thornless'.	Late 2019

Primocane-fruiting	Yield vs. 'Prime-Ark®45'	Fruit Size	Other Characteristics	Available at Nursery?
ORUS 4999-2	Greater	Large	Thorny. **Early**—begins earlier than 'Prime-Ark®45'. Attractive, well-formed, tasty fruit. Stores well.	Late 2019

Dwarf, Ornamental	Yield vs. 'Marion'	Fruit Size vs. Marion =5.0-5.5 g	Other Characteristics	Available at Nursery?
ORUS 4535-1	Less	Similar	**Thornless Dwarf**. Canes are 2-2.5' long. Fruit is well-set, medium-sized, nicely shaped, with medium firmness and good flavor.	Yes
