

plantlogic

innovative products
for smart growers

www.getplantlogic.com

plantlogic is focused on designing and manufacturing substrate production containers, to help growers have better management of their crops with increased uniformity, resulting in stronger yields.

Global reach

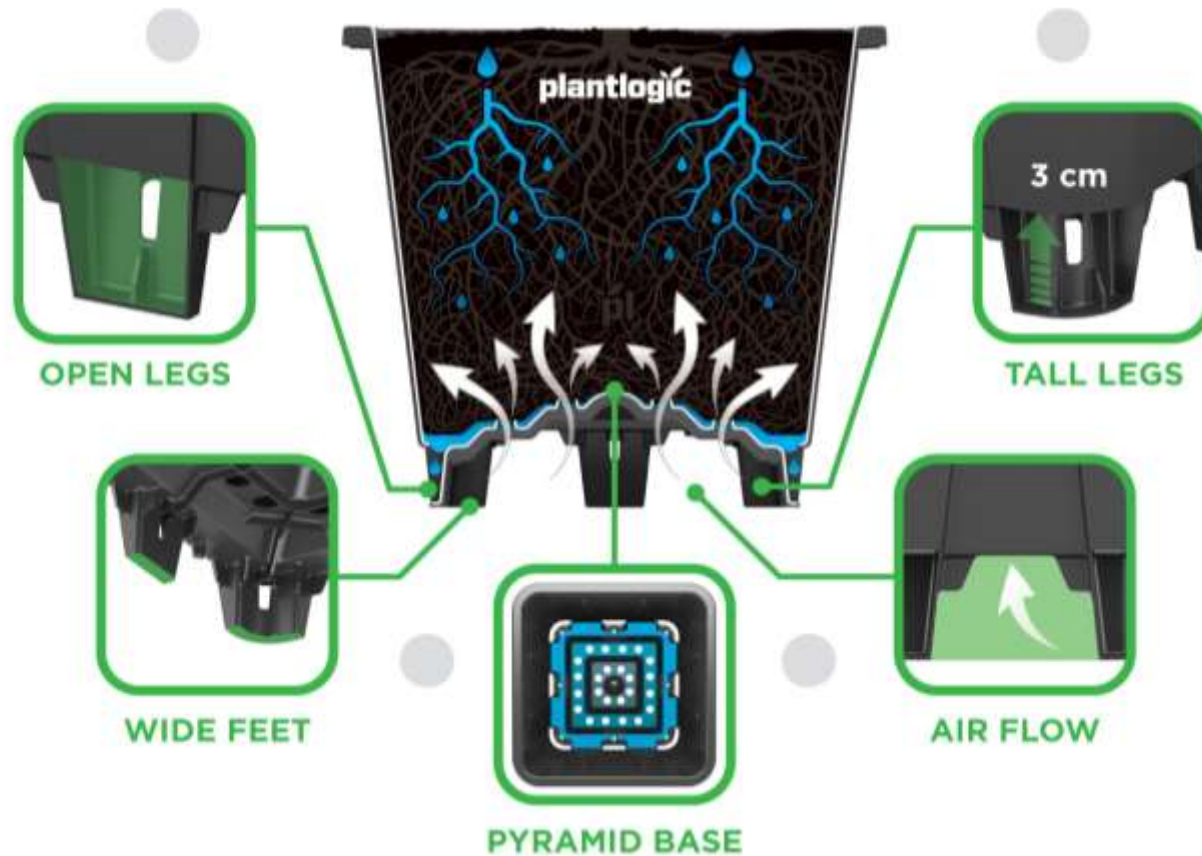

Established Products

Innovative Solutions

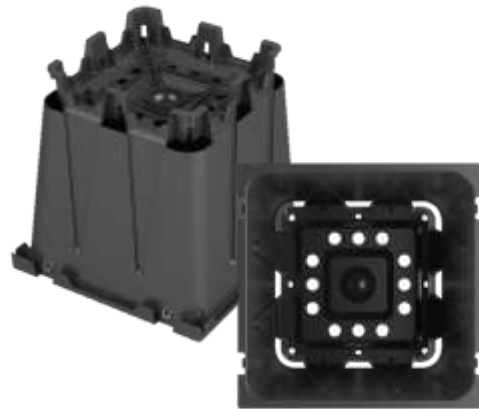

- ❖ Tall legs prevents root contact with soil, pathogens and improves drainage.
- ❖ Pyramid base forces water to drain at the outside edges and minimizes wet zone.
- ❖ Drainage into high air flow area for root self-pruning.

3 Liter

New 5 Liter

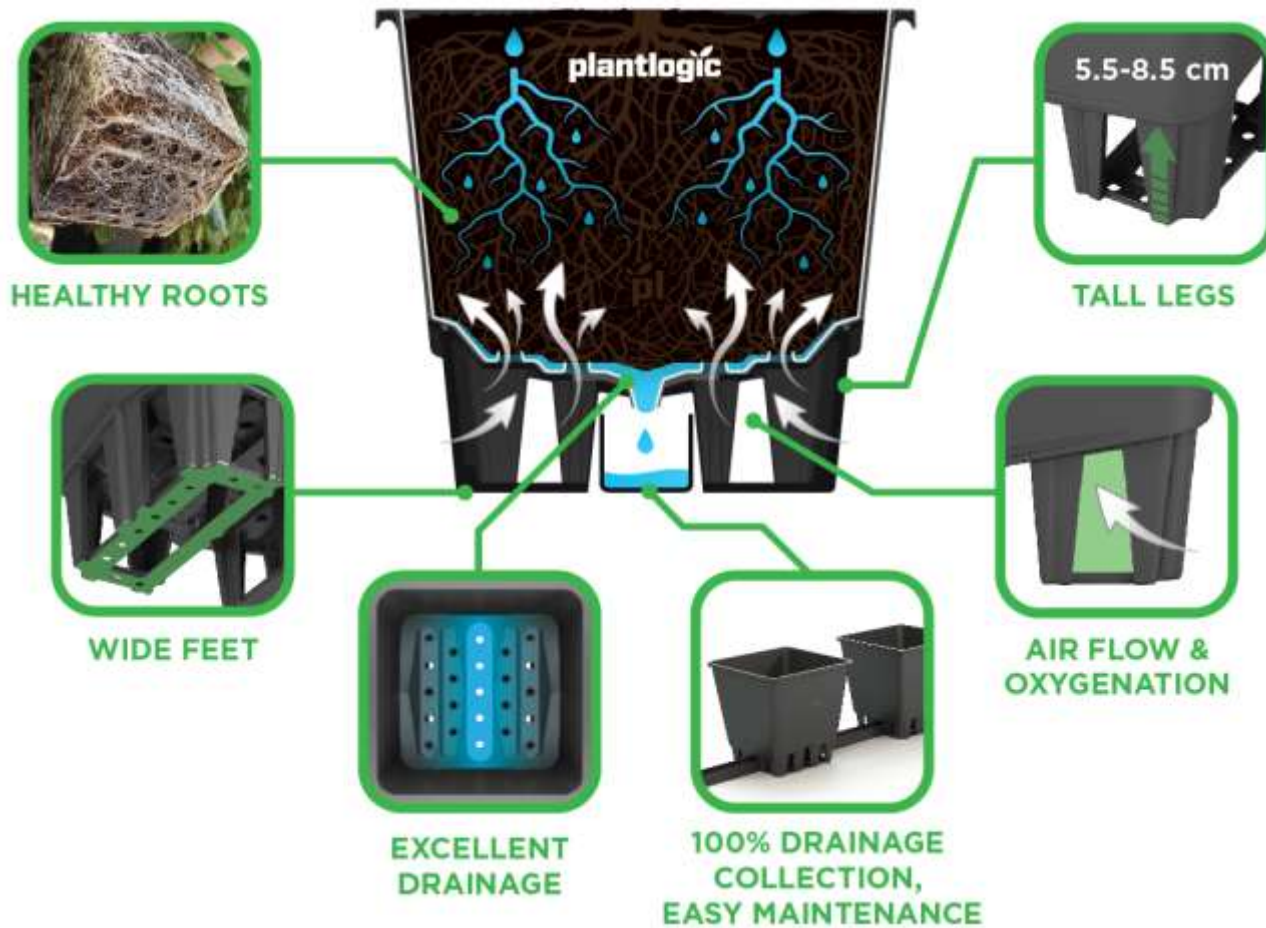

7 Liter

10 Liter

Pots for Drainage collection

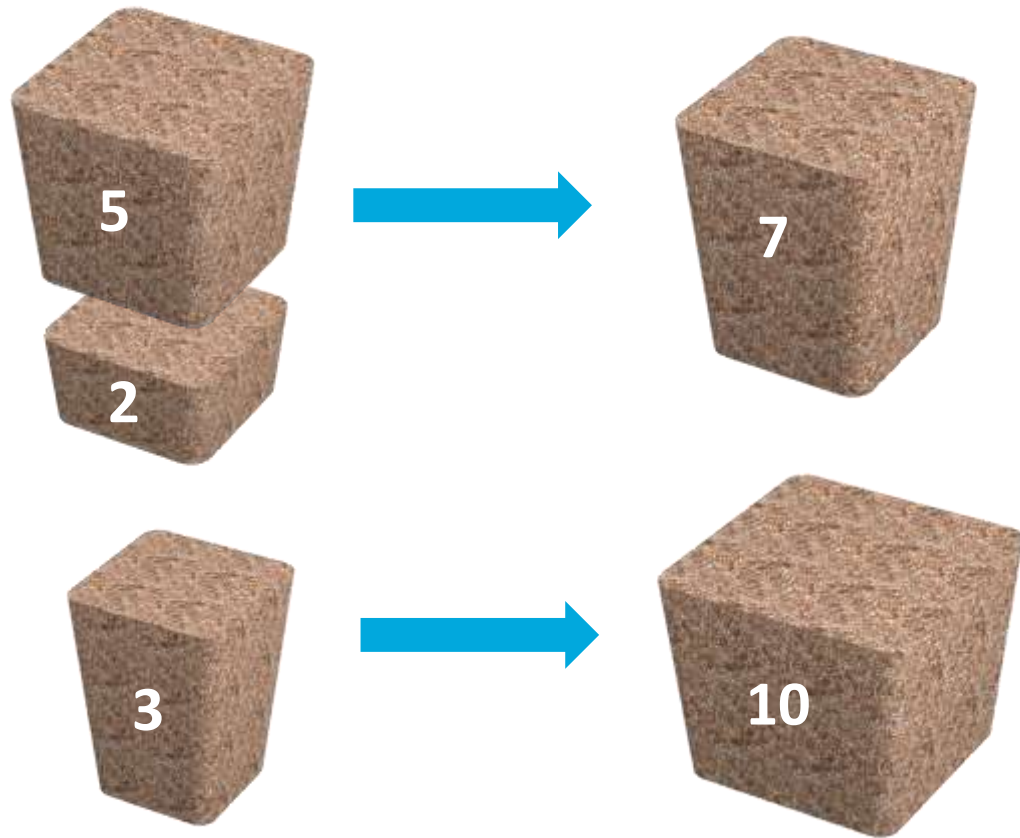

- ❖ Excellent drainage and root oxygen uptake.
- ❖ Controls humidity within tunnels.
- ❖ Cost effective system design.
- ❖ Wide legs are stable even on soft surfaces.
- ❖ Prevents root contact with soil pathogens and improves drainage and rootzone health.
- ❖ Avoid environmental impact of drainage.

Re-potting

*Reduce up-front capital
and storage costs*

Pot cover

Prevents sucker growth

- ❖ Saves labor from hand removing the sucker growth.
- ❖ Stops weeds competing with your crop for water and nutrition.
- ❖ Holds the irrigation pipe to the pot preventing dripper from falling off.
- ❖ Saves water due to less evaporation
- ❖ Fruiting canes remain in the middle of the pot allowing for better stacking ability in bins for cold storage
